I have just received my XM Satellite radio with my new vehicle and am very pleased with the offerings of the system. I do not think that the general broadcasting industry should be able to block any portion of the services of this broadcast service. I really feel that the ability to listen to radio free of all of the commercials that normal radio has is well worth the nominal costs. I now have the ability to listen to the same station anywhere in the United States and do not have to hunt for information on the normal radio dial.
